Vicky Bempi, Project Manager, *Prolepsis Institute*

January 2025

Co-funded by the
European Union

Setting the stage

Children, face great challenges in the post-COVID era, with a critical shortage of mental health support across Europe

Slovakia

- Reintegrating into society after the disruption of healthy social connections
- Only 49 child psychiatrists: available nationwide.
- Fewer than 20% of schools have a dedicated school psychologist.

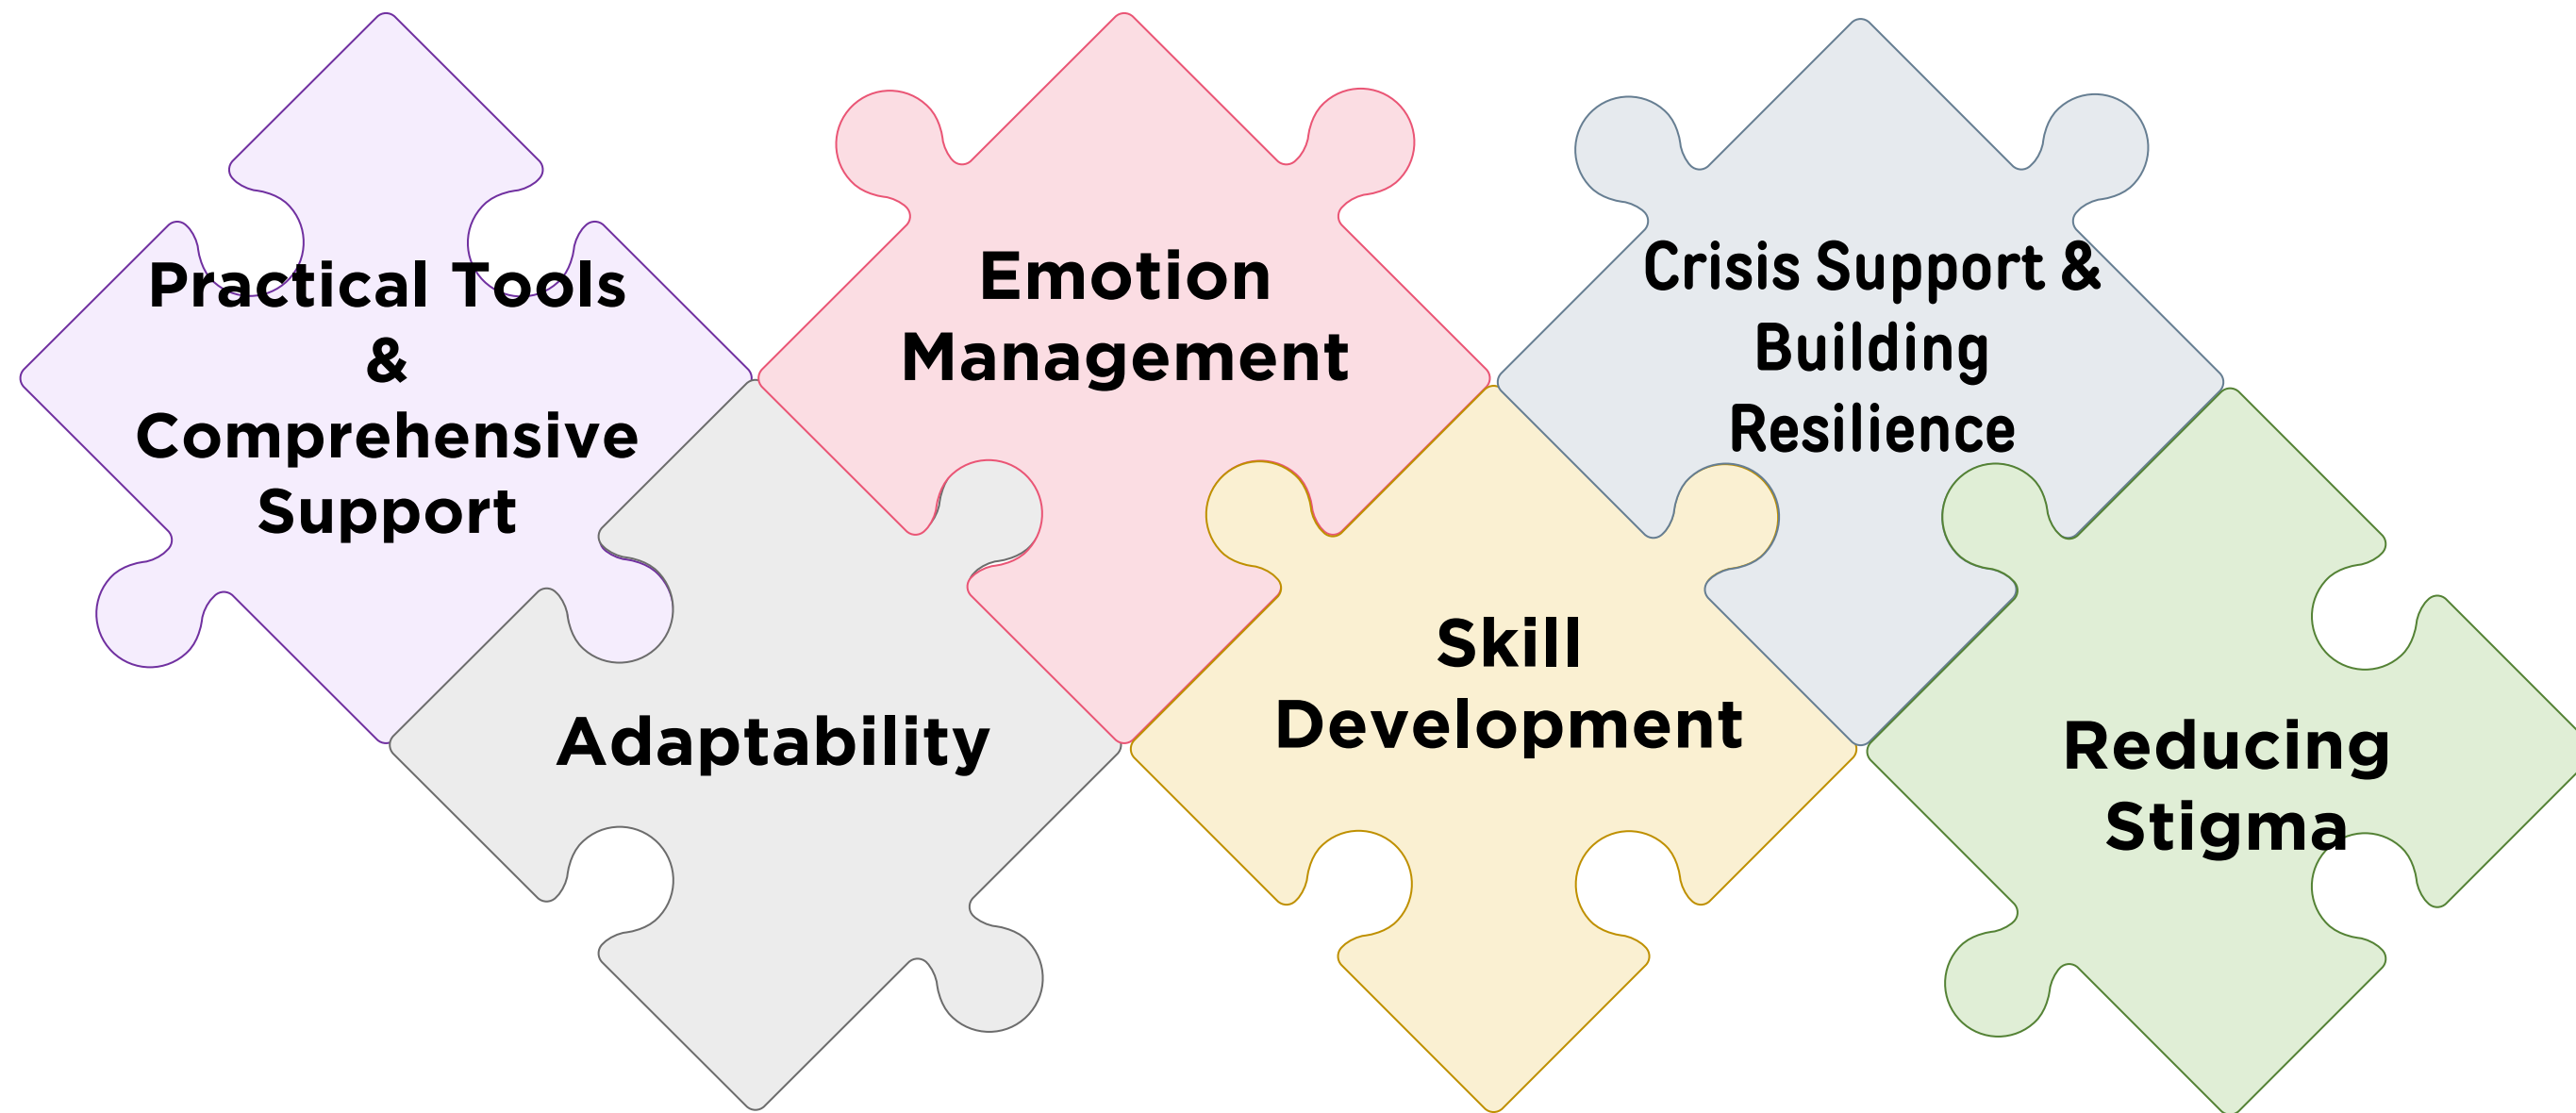

Greece

COVID-19 and natural disasters led to:

- Young children express feelings of isolation, loneliness, depression, uncertainty, fear, anxiety, stress
- School teachers witnessing the mental health deterioration of children struggling to provide adequate support, without having the proper resources

Solution & Value Proposition

The toolkit “**A Happy, Healthy and A Hopeful, Healthy, and Happy Living and Learning Toolkit / Teachers’ Guide**” combines:

Validation & Credibility in Slovakia and Greece

The implementation lasted for 6 months (January – June 2024)

32 schools participated in the implementation

A total of 144 teachers implemented the toolkit in their classrooms

In both countries of implementation, the Toolkit:

- Demonstrated potential to improve mental health and well-being for children, educators, and parents.
- Adaptable, easy-to-use, and comprehensive approach, showing meaningful results in managing stress, building resilience, and fostering positive relationships.
- Teachers report it as a practical, time-efficient resource that integrates seamlessly into the curriculum.
- Parents reported improvements in children's mental health and ability to cope with challenges at home.

Key Ask

Join Us in Creating a Future Where:

- Mental health is prioritized
- Resilience is nurtured
- Every child and educator can thrive

Support needed to expand its reach and impact

Partnerships, advocacy, and funding to scale the toolkit across Europe

Collaboration opportunities to integrate the toolkit into existing educational programs and initiatives

Engagement with stakeholders to promote widespread adoption and long-term sustainability

unpredictability + high work intensity

=

factors affecting mental and social health

temporarily or chronically

quality of work performance

Team Reflection

- Developed by Dutch authors to support care professional teams to stay healthy
- resource could be used by employees to manage stress on an individual and collective level by helping each other in a healthy way

Approach:

- **normalizing stress:** response to a stressful period is normal in certain circumstances and may vary from person to person
- **providing guidance** to make stress manageable: recognize and manage the signs of stress together
- **continuing to support** each other in the team in dealing with stress (the buddy approach)

Municipal social care institutions

RSCC «Mežciems»

RSCC «Gaiļezers»

RSCC «Stella Maris»

Riga Shelter

Duration - July 2023 - June 2024.

Translation of the program materials – May 2023 - July 2023

Preparation and printing materials for training - July 2023 – August 2023

Training of specialists - 4 trainings / 4 specialists totally - August 2023

4 focus groups - 8 meetings totally (2 meetings for each group)

50 participants totally

Survey's organized - focus group survey, stakeholder's survey

EMPLOYEES,
EXPERIENCING WERE
MENTIONED SIGNS OF
STRESS

CONCENTRATION AND
MEMORY DISORDERS

DIFFICULTIES IN
NAVIGATING IN SPACE AND
TIME

ANXIETY

PANIC ATTACKS

ETC.

BENEFITS

Better understanding about colleagues' feelings, experiences, stress level

Fostered a listening culture in organization

Brought the team and colleagues closer together

Promoted a sense of community with colleagues which is the basis for successful work

Self-perception of increased awareness and knowledge of stress symptoms and stress management methods/techniques

Better understanding of each individual's role in solving stressful situations

IMPROVEMENTS

Hold regular group meetings

Implement such programs in other institutions, for example schools etc.

Organize classes outside of work premises thus work duties won't interfere fully focus on group work

Focus attention to innovative methods

Group size should not exceed 10-12 participants

RISKS AND BARRIERS

Convincing stakeholders – deputies, administrations and managers of social care centers etc.

Implementation – all activities should be prepared according Public Procurement Law. It takes time (standard procedure ~ 2 weeks – 2 months)

Assembling groups - could be complex due to variations in schedules, premise options, vacation times, and workload among different institutions

Potential costs – could be situation when financial resources are not available

Ensuring sustainability - the offer does not always coincide with the needs and interests of the group, institution

THANK YOU!

MENTAL HEALTH QUALITY PRACTICES

Co-funded by the
European Union

The Map of Support is a living process.

The map is built around the community-based services provided by the League for Mental Health.

Slovakia

- Limited Access to Vital Services
- Lack of Awareness
- Mental Health Care Challenges
- Stigma and Social Isolation
- Lack of Advocacy

Solution

The Map of Support is a tool that brings together formal health and community support services

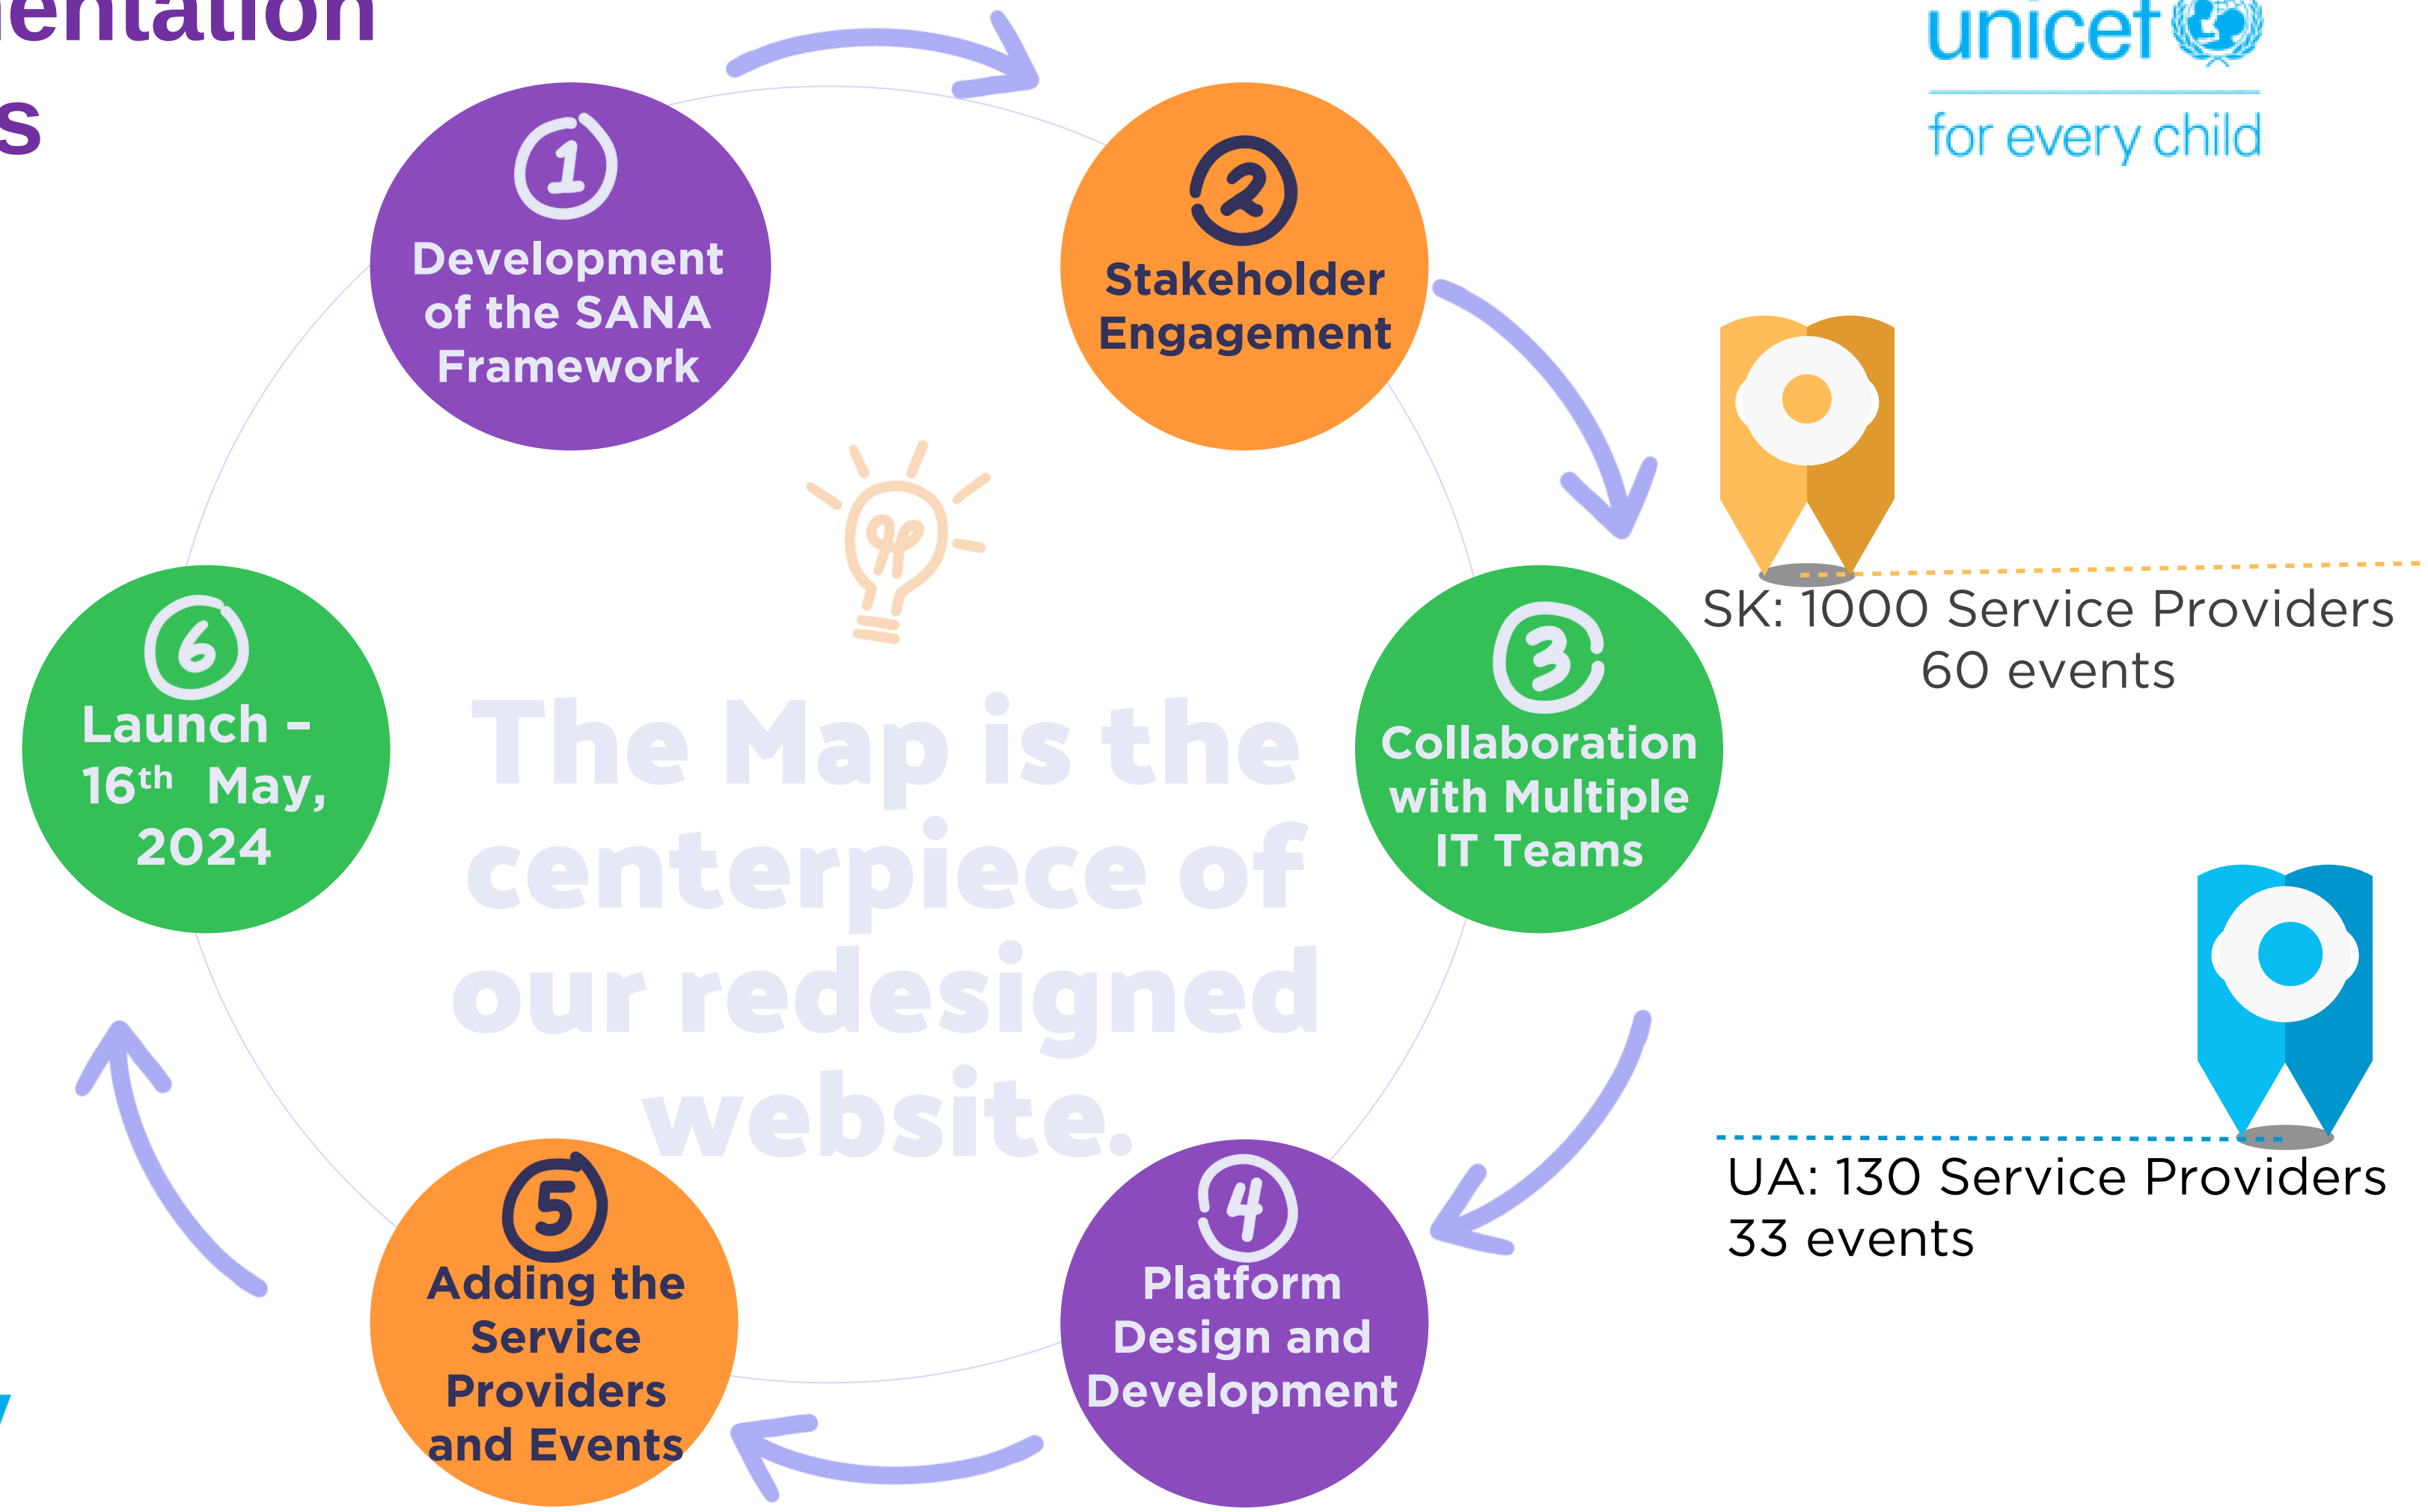

- Reducing stigma and isolation
- Improving communication between MH providers
- Raising awareness and utilization of MH resources

Value

- User-friendly interface
- Improved access to information and resources
- Targeted information for different population groups

What truly sets this tool apart is its accessibility.

Implementation Process

Validation & Credibility in Slovakia

What went well?

User-Friendly
Design and Improved
Accessibility

What could have been better?

Collaboration with
ONE Dedicated IT
Team

What will we do differently?

Simpler IT solutions
can save time,
money, and energy.

What is next?

Inclusion in a
mobile application
for on-the-go
accessibility &
Resource-Intensive
Maintenance.

THE MAP OF SUPPORT

Support needed to expand its reach and impact

Partnerships, advocacy, and funding to scale the MAP

Collaboration opportunities to integrate the Map

Engagement with stakeholders to promote widespread adoption and long-term sustainability

The Map in Romania – an online tool that engaged people with lived experiences, volunteers and professionals replicated after a Polish practice from Human Foundation

www.hartasanatatiimintale.ro

Objectives:

- to engage and empower people with lived experiences during the entire process
- high diversity of service providers
- holistic view in the bio-psycho-social model
- increase cooperation and communication
- evaluate services and providers --> trigger improvements

Target population:

- adults with mental health disabilities, carers/ relatives
- general population
- mental health professionals and institutions
- educators and researchers
- companies

Impact

- Various collaborators - Estuar Cluj servioeces users, students, volunteers, Estuar staff.
- Over 165 institutes/organizations introduced on the Map of Support
- Over 800 participants during the promoting events for the map
- Other collaborators: psychiatric hospitals in Cluj county, Social Work Faculty and Psychology Faculty, public institutions (medical, social, administrative sectors) in the Cluj county
